EJ Fuzz Face

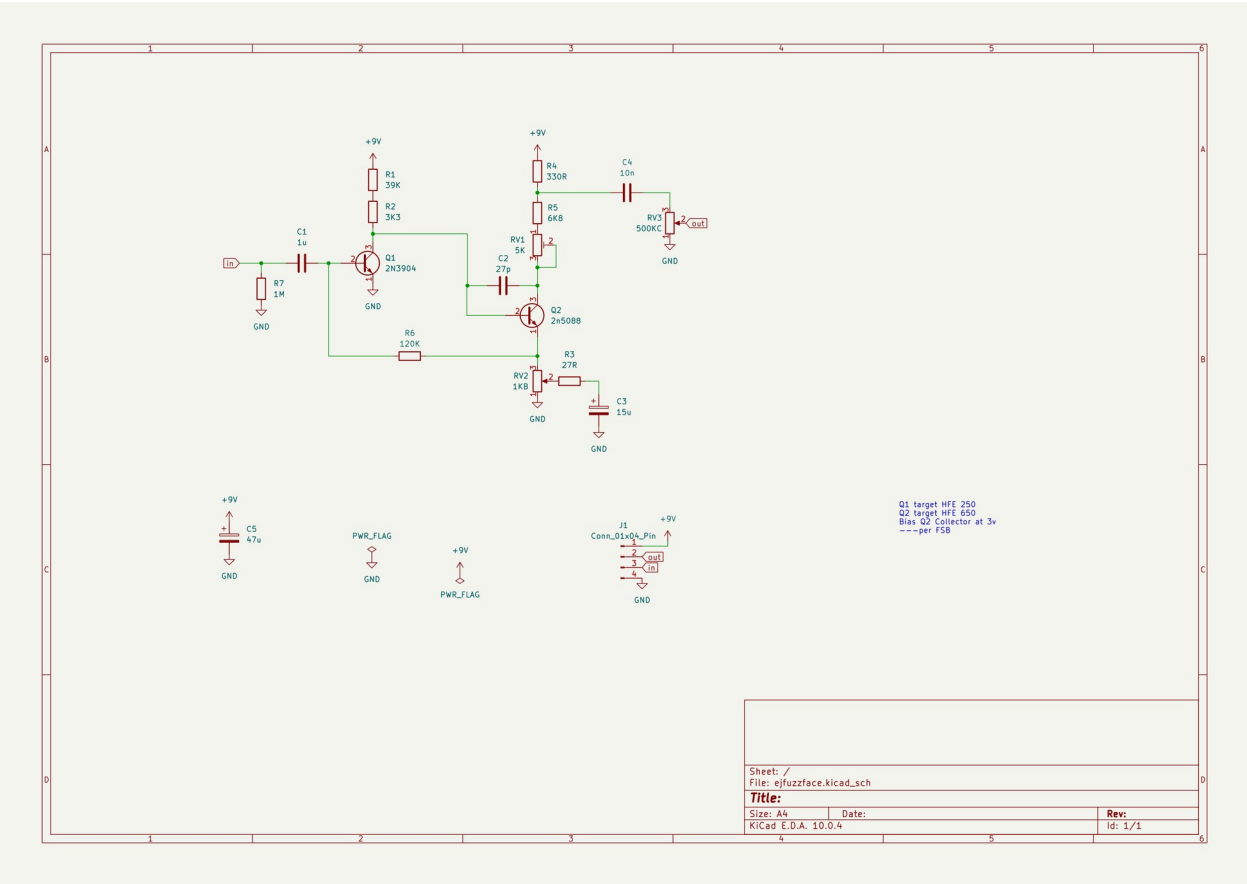

This is a clone of the Eric Johnson fuzz face. Very nice sound, and gets very crunchy when first in the chain.

This is the 2nd version of the pedal. The first version had the fuzz pot without a ground connection

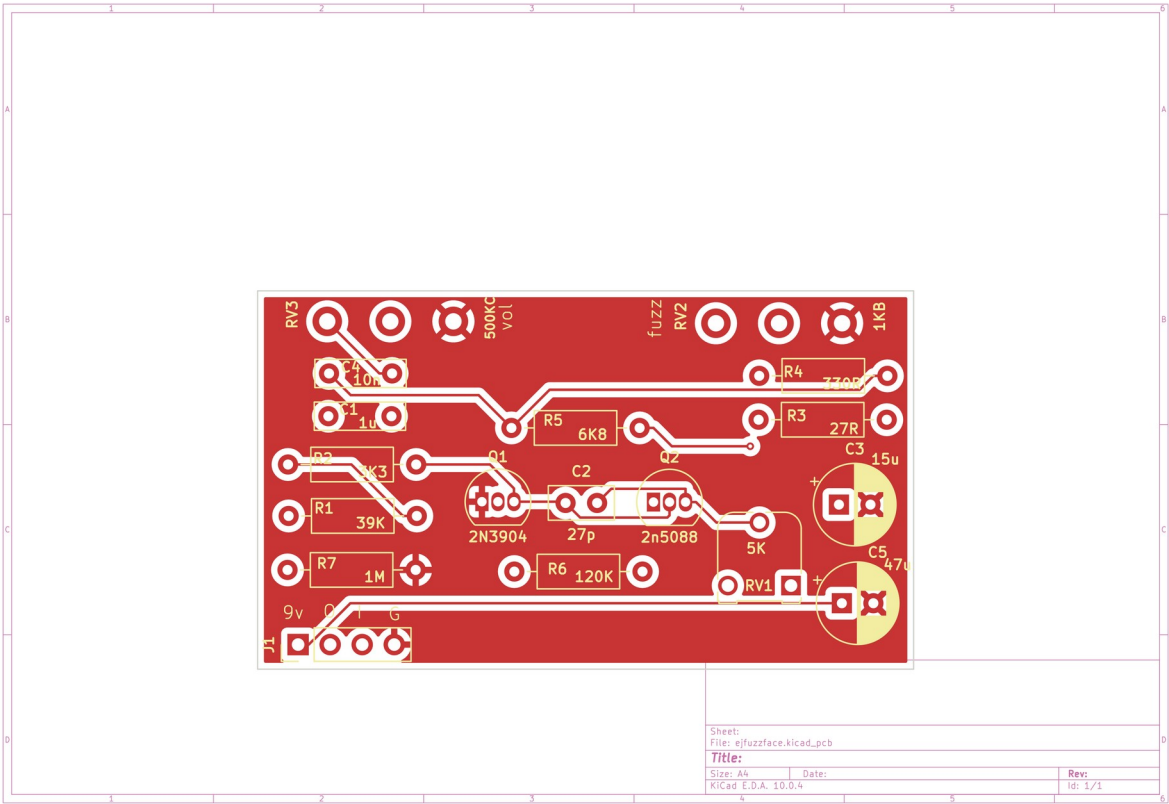

So this pedal circuit is verified. I hate using a 125B box on something this small but my last attempt at boxing top-jacks on a 1590B did not work very well.

Anyway, all trademarks belong to their respective owners.
